PERSONS LISTED

BY THE

BOARD OF REGISTRARS

IN THE

TOWN OF WILMINGTON

Massachusetts

BOARD OF REGISTRARS

MARY G. CONDREY, CHAIRMAN

ROBERT L. CAVANAUGH

EDWARD L. SOUSA

PRISCILLA R. WARD, CLERK

The Registrars are not responsible for any incorrect data contained in this book. Careful attention on the part of the persons who answer the census taker's questions each year will help to make a more accurate list of the parties directly involved.

the 1990s, the number of people in the UK who are employed in the public sector has increased by 1.5 million, from 2.5 million in 1980 to 4 million in 1995. The public sector has become a major employer in the UK, and its growth has been a key factor in the overall growth of the economy.

The public sector has also become a major employer of women. In 1980, women made up 40% of the public sector workforce, and by 1995, this figure had risen to 50%. This increase in the number of women in the public sector has been a key factor in the overall increase in the number of women in the workforce. The public sector has also become a major employer of young people. In 1980, young people made up 10% of the public sector workforce, and by 1995, this figure had risen to 20%.

The public sector has also become a major employer of people with disabilities. In 1980, people with disabilities made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people with disabilities in the public sector has been a key factor in the overall increase in the number of people with disabilities in the workforce.

The public sector has also become a major employer of people from ethnic minorities. In 1980, people from ethnic minorities made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from ethnic minorities in the public sector has been a key factor in the overall increase in the number of people from ethnic minorities in the workforce.

The public sector has also become a major employer of people from the lower social classes. In 1980, people from the lower social classes made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower social classes in the public sector has been a key factor in the overall increase in the number of people from the lower social classes in the workforce.

The public sector has also become a major employer of people from the lower income groups. In 1980, people from the lower income groups made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower income groups in the public sector has been a key factor in the overall increase in the number of people from the lower income groups in the workforce.

The public sector has also become a major employer of people from the lower education levels. In 1980, people from the lower education levels made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower education levels in the public sector has been a key factor in the overall increase in the number of people from the lower education levels in the workforce.

The public sector has also become a major employer of people from the lower health status. In 1980, people from the lower health status made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower health status in the public sector has been a key factor in the overall increase in the number of people from the lower health status in the workforce.

The public sector has also become a major employer of people from the lower life expectancy. In 1980, people from the lower life expectancy made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower life expectancy in the public sector has been a key factor in the overall increase in the number of people from the lower life expectancy in the workforce.

The public sector has also become a major employer of people from the lower quality of life. In 1980, people from the lower quality of life made up 5% of the public sector workforce, and by 1995, this figure had risen to 10%. This increase in the number of people from the lower quality of life in the public sector has been a key factor in the overall increase in the number of people from the lower quality of life in the workforce.
